

## Project Planning Phase

### Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

|               |  |
|---------------|--|
| Date          | 29 October 2023                                |
| Team ID       | Team-  |
| Project Name  | Deep Learning Model for Eye Disease Prediction |
| Maximum Marks | 4 Marks  |

### Product Backlog, Sprint Schedule, and Estimation (4 Marks) :

| Sprint     | Functional Requirement (Epic)   | User Story Number | User Story / Task  | Story Points | Priority | Team Members       |
|------------|---------------------------------|-------------------|--|--------------|----------|--------------------|
| Sprint-1   | Project Setup & Infrastructure  | USN-1             | Set up the development environment with the required tools and frameworks for Eye Disease Prediction                       | 4            | High     | Veeresh Thakur     |
| Sprint-2   | Data Collection & Preprocessing | USN-2             | Gather a diverse dataset of eye disease images for training the deep learning model  | 4            | High     | Yash Raj Singh     |
| Sprint-2   | Data Preprocessing              | USN-3             | Preprocess the collected dataset by resizing images, normalizing pixel values, splitting it and doing image augmentation   | 6            | High     | Vishal Kumar Singh |
| Sprint-3   | Model Training                  | USN-4             | Split dataset and train the models (Inception V3, VGG19, and RESNET 50)  | 6            | High     | Deepanshu Dariya   |
| Sprint - 3 | Model Evaluation                | USN-4             | Evaluate model performance on the validation set and select the best model among Inception V3, VGG19, and RESNET 50 models | 7            | High     | Yash Raj Singh     |
| Sprint-3   | Model Development               | USN-5             | Use the selected deep learning model for prediction and monitor its performance on new data                                | 2            | High     | Veeresh Thakur     |

|          |                                |       |   |   |        |                                       |
|----------|--------------------------------|-------|---|---|--------|---------------------------------------|
| Sprint-4 | Model Deployment & Integration | USN-7 | Deploy the trained deep learning model as an API or web service and integrate it into a web interface | 4 | Medium | Veeresh Thakur                        |
| Sprint-5 | Testing & Quality Assurance    | USN-8 | Conduct thorough testing, fine-tune model hyperparameters, and optimize performance                   | 3 | Medium | Vishal Kumar Singh & Deepanshu Dariya |

Project Tracker, Velocity & Burndown Chart: (4 Marks)

| Sprint   | Total Story Points | Duration | Sprint Start Date | Sprint End Date (Planned) | Story Points Completed (as on Planned End Date) | Sprint Release Date (Actual) |
|----------|--------------------|----------|-------------------|---------------------------|---|------------------------------|
| Sprint-1 | 4                  | 5 Days   | 18 Oct 2023       | 22 Oct 2023               | 4   | 22 Oct 2022                  |
| Sprint-2 | 10                 | 6 Days   | 23 Oct 2023       | 28 Oct 2023               | 10  | 28 Oct 2022                  |
| Sprint-3 | 15                 | 6 Days   | 29 Oct 2023       | 3 Nov 2023                | 13  | 3 Nov 2023                   |
| Sprint-4 | 4                  | 4 Days   | 4 Nov 2023        | 7 Nov 2023                | 3   | 7 Nov 2023                   |
| Sprint-5 | 3                  | 2 Days   | 8 Nov 2023        | 9 Nov 2023                | 0   | 9 Nov 2023                   |
|          |                    |          |                   |                           |   |                              |

Velocity:

*Average Velocity* = \_\_\_\_\_

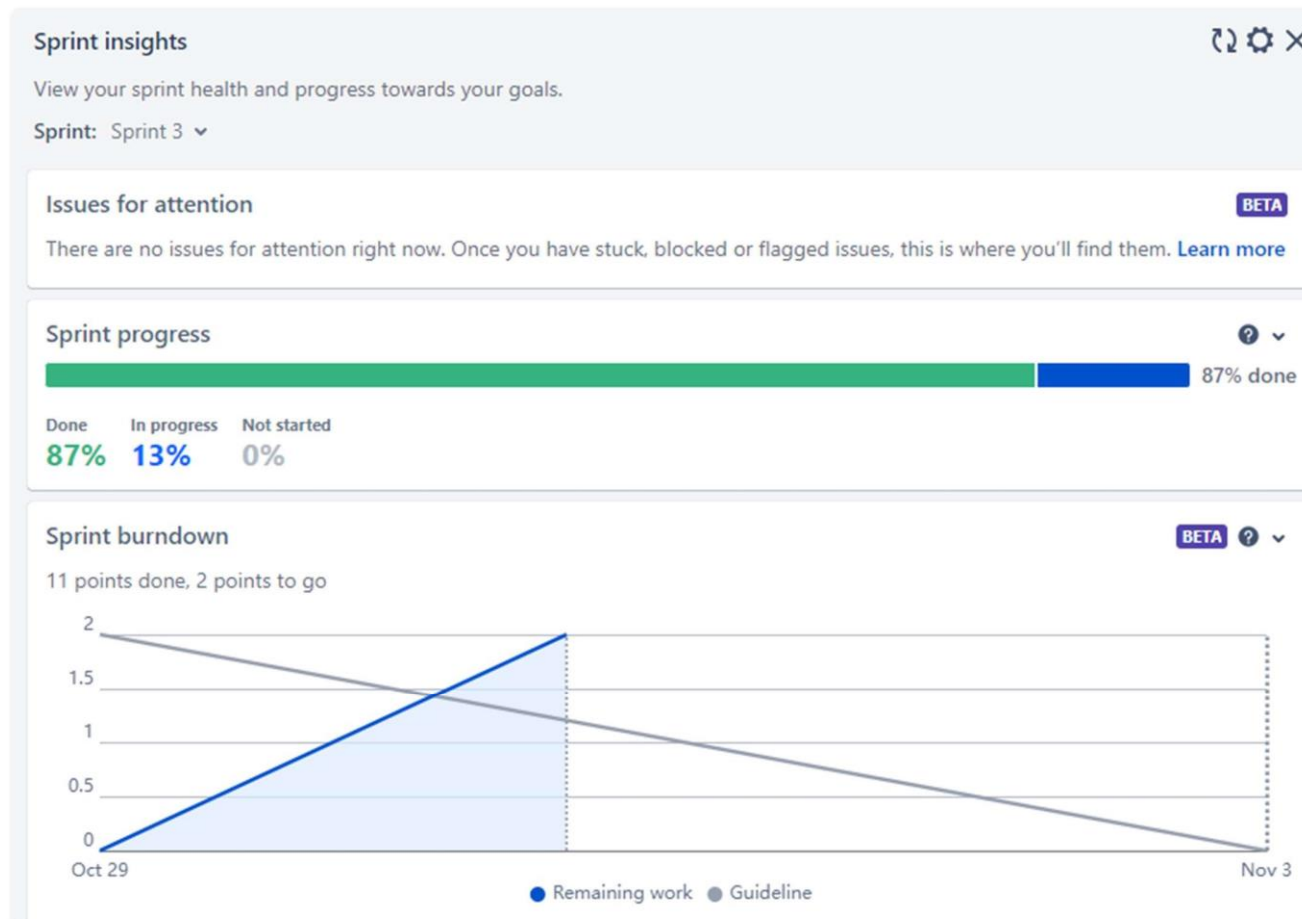

Total Story points Completed =  $4+10+13+3 = 30$

Total Duration of Sprints =  $5+6+6+4 = 21$

*Average Velocity* =  $\frac{30}{21} = 1.42$

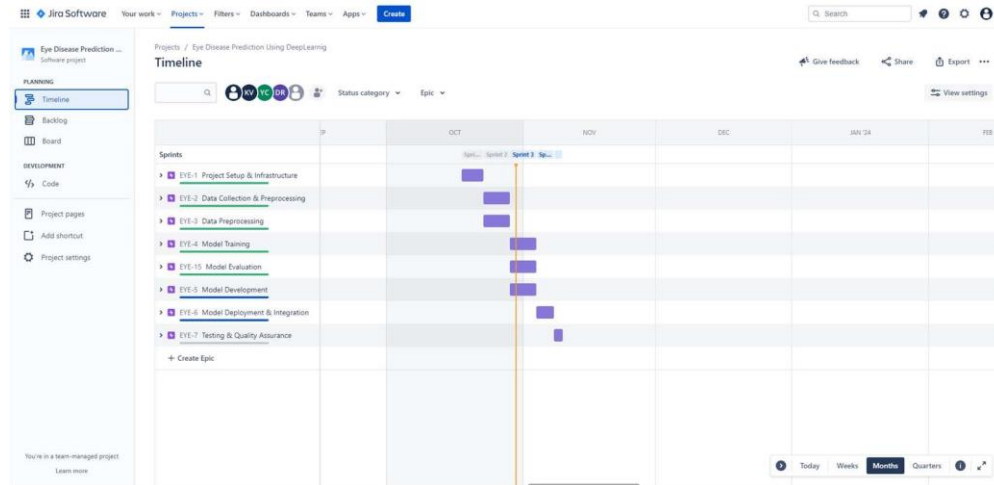

#### Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.

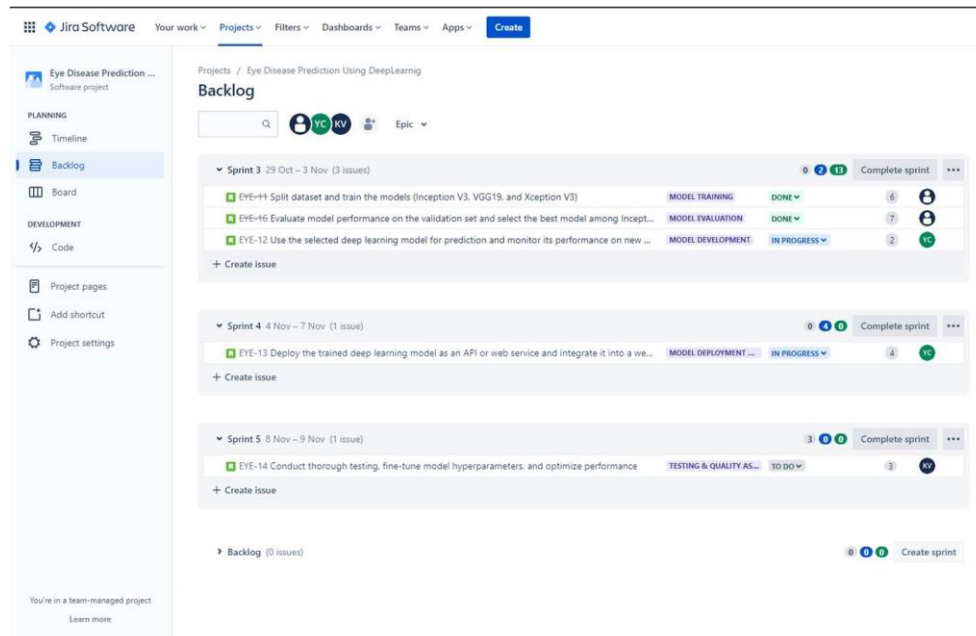

□ We have Completed Sprint 1 and 2 and Sprint 3 is Ongoing
