

Says

What have we heard them say?
What can we imagine them saying?

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

- 1. Eye disease detection using deep learning is the need of the hour
- 2. Deep learning in the field of health care has proven to be effective
- 3. The scale of eye diseases will increase in the near future

- 1. Effective model with efficient results is wanted
- 2. The success rate should be maximum for better cure
- 3. Complete transparency of the model to the people

- 1. The model is completely tested and verified for the use
- 2. The accuracy has been measured properly
- 3. Real world problems have actually been solved using the model
- 4. Has been proven to be effective in maximum cases with appropriate results

- 1. That the disease detection model would not be efficient enough for the cure
- 2. The accuracy of the model might not satisfy the needs
- 3. Whether the model can be trusted or is it risky to do so

Does

What behavior have we observed?
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?
